Team leaders!

Bring your organisation's most promising young talents and middle managers to this unique leadership development session hosted by the Danish-Chinese Business Forum in cooperation with Huawei Technologies and Copenhagen Game Lab!

At this event, we'll challenge your leadership skills with Copenhagen Game Lab's specially developed board game, "Team Leader". The game is a fun and innovative way to practice the decision-making dilemmas facing team leaders. Players juggle the tasks of the team with the demands of the management in a realistic environment that challenges both younger and more experienced managers to rethink their style.

[Click here](#) for a video teaser about the game. Click the pictures below to see the profiles of our featured speakers.

We look forward to seeing you and your young talents there!

Jimmy Holm Olsen is founding partner at Copenhagen Game Lab, which develops innovative learning games that enhance leadership and cooperation capabilities.
